

Procedure for Wednesday, September 16th 2015

1. Complete all steps from yesterday's procedure before moving on. A copy of the procedure can be found on 7bscience.com under yesterday's post.
2. Download handout 12 from 7bscience.com
3. Work through the sheet step-by-step. If you have any questions, please see Mr. Ower.

I finished early, now what?

1. Review for your microscope test. Practice with a table partner who is also completed all the steps above. You can also make flash cards of the parts, rules, etc.
2. Optionally complete the extension page in Schoology (look in the Extensions Folder, IBI Lesson 1). This is a good way to challenge yourself with our current topic.
