

Procedure for Friday, September 25th 2015

Instructions: Complete each step below. After you complete each step, mark it off.

Before you begin:

- ✓ Check your overall grade in Schoology.
 - ✓ If you did not submit your IBI Lesson 3 Reflection or the Blackworm Data Table, you must complete and submit these before completing the steps below.
1. Read pages 60-63
 2. Download handout 16 from 7bscience.com
 3. Fill in the graphic organized based on the reading you did.
 4. Answer the questions that follow the graphic organizer.
 5. Complete the organism info sheet for the blackworm. Use the blackworm activities and reading to help you. You may not be able to complete all boxes (e.g. you will have limited information for growth and development).
 6. Get your pond and observe a few samples under the microscope (only use low and medium power):
 - A. Cover slips, pipettes, and microorganism sheets are on the front table.

I finished early, now what?

7. Submit your data table and IBI Lesson 3 homework in Schoology.
8. Work on the Organism Fact Sheet (download from 7bscience.com). Follow the instructions.
9. Complete the lesson extensions in Schoology (look in the Extensions Folder). This is a good way to challenge yourself with our current topic and expand your learning!
