

Agenda for Thursday, October 1st 2015

Agenda	Homework
1. Kahoot! 2. Fast Plant Data 3. Animal Cell Observations (H18)	- Review flash cards - Cell Parts quiz on Friday

Why are we doing this?

We need to collect data on our Fast Plants. This is needed so we can track its growth and development over time. This will assist us in completing a project on the life cycle of the plant. We also need to finish our animal cell observations.

Today's Procedure

1. Download the Fast Plant Data Tracker handout.
2. Listen as we discuss how we will fill this sheet every Tuesday and Thursday.
3. Complete the sheet for today. When you are done, move on to the next step.
4. Finish your animal cell observations sheet, including the questions that are after your drawings. This may mean you need to observe cheek or nerve cells. I have prepared slides of each on the front table.

I finished early, now what?

1. Review your flash cards for your cell parts quiz on Friday.
2. Optionally complete any of the lesson extensions Schoology (look in the Extensions Folder). This is a good way to challenge yourself with our current topic.
